

DAP
Drug Advisory Programme

Training Update

ISSUP 2022, Abu Dhabi

GCCC: Commission Meeting
Dr. Nathalie Panabokke

DAP ACTIVITIES: Capacity Building

- DAP promotes the provision of treatment and care services that are based on evidence and in adherence to ethical standards.
- DAP taps treatment experts to develop guidelines and provide mentoring in conducting, managing and operating treatment programs.
- DAP promotes access to treatment by:
 - Advocacy
 - Development of international minimum treatment standards and service quality
 - Training of service providers
 - Monitoring and evaluation of treatment programs

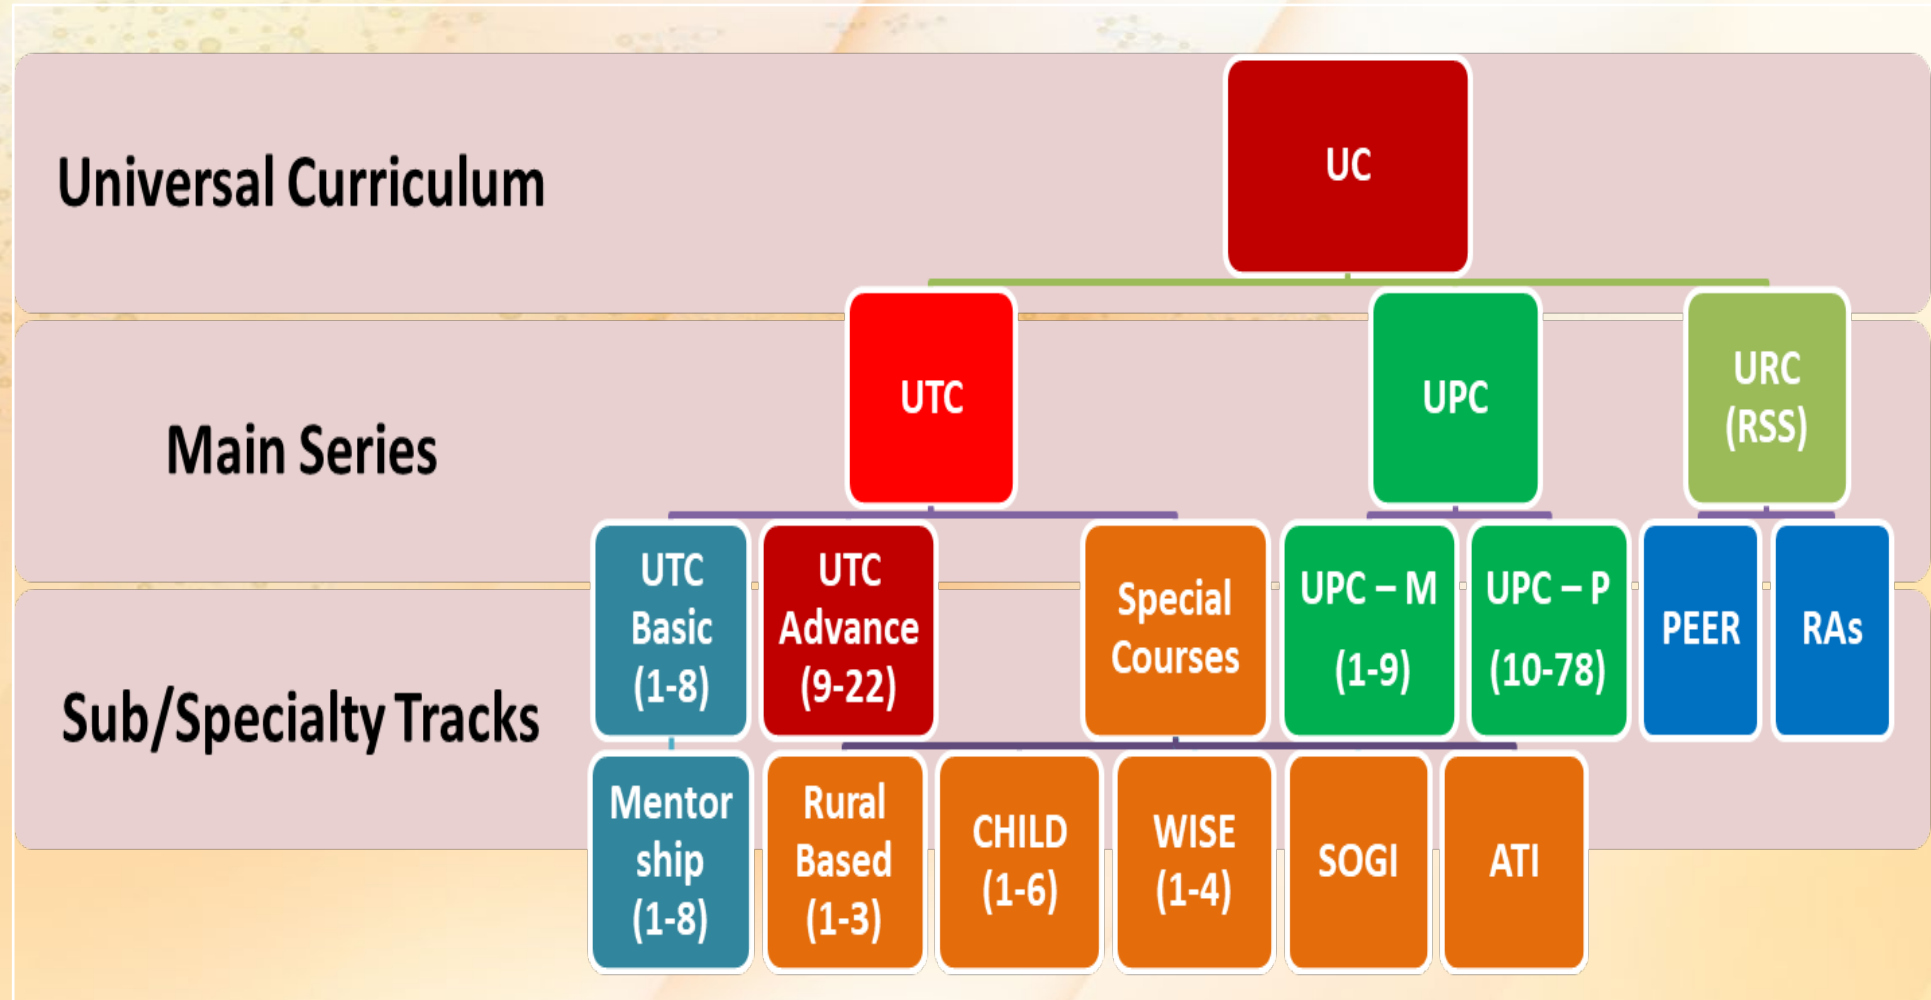

Key Activities

- Curriculum Development
- Development of Training Teams
- Dissemination of Training
- Support of Treatment and Prevention Services

UNIVERSAL CURRICULUM

Part of DAP's work is building the capacity of the Drug Demand Reduction Workforce Worldwide.

To achieve this end, DAP collaborates with International Advisory Panels of experts to develop Training Curricula in the areas of Prevention and Treatment of SUDs.

DAP ACTIVITIES: Training and Capacity Building

Since 2017.,

DAP Online Activities 2020

TRAININGS ON UNIVERSAL CURRICULA

Along with the outbreak of covid-19 pandemic, DAP has transformed its' activities including UC trainings from physical settings to virtual platforms. Our online transformation includes virtual trainings, trainer-led and self-led courses.

UNIVERSAL CURRICULA

Virtual Trainings

Since the outbreak of the Pandemic in early 2020, DAP has nearly trained 580 individuals from its' Asian Members on the Universal Curricula through;

- 24 National V-Trainings,
- 3 Regional V- Trainings, &
- 5 V-Pilots

Instructor-led courses

Most of the UTC and UPC courses which are being piloted online will be converted to instructor-led within the next 2 years. The instructor-led courses will be available on a set schedule with some synchronous sessions with a trainer.

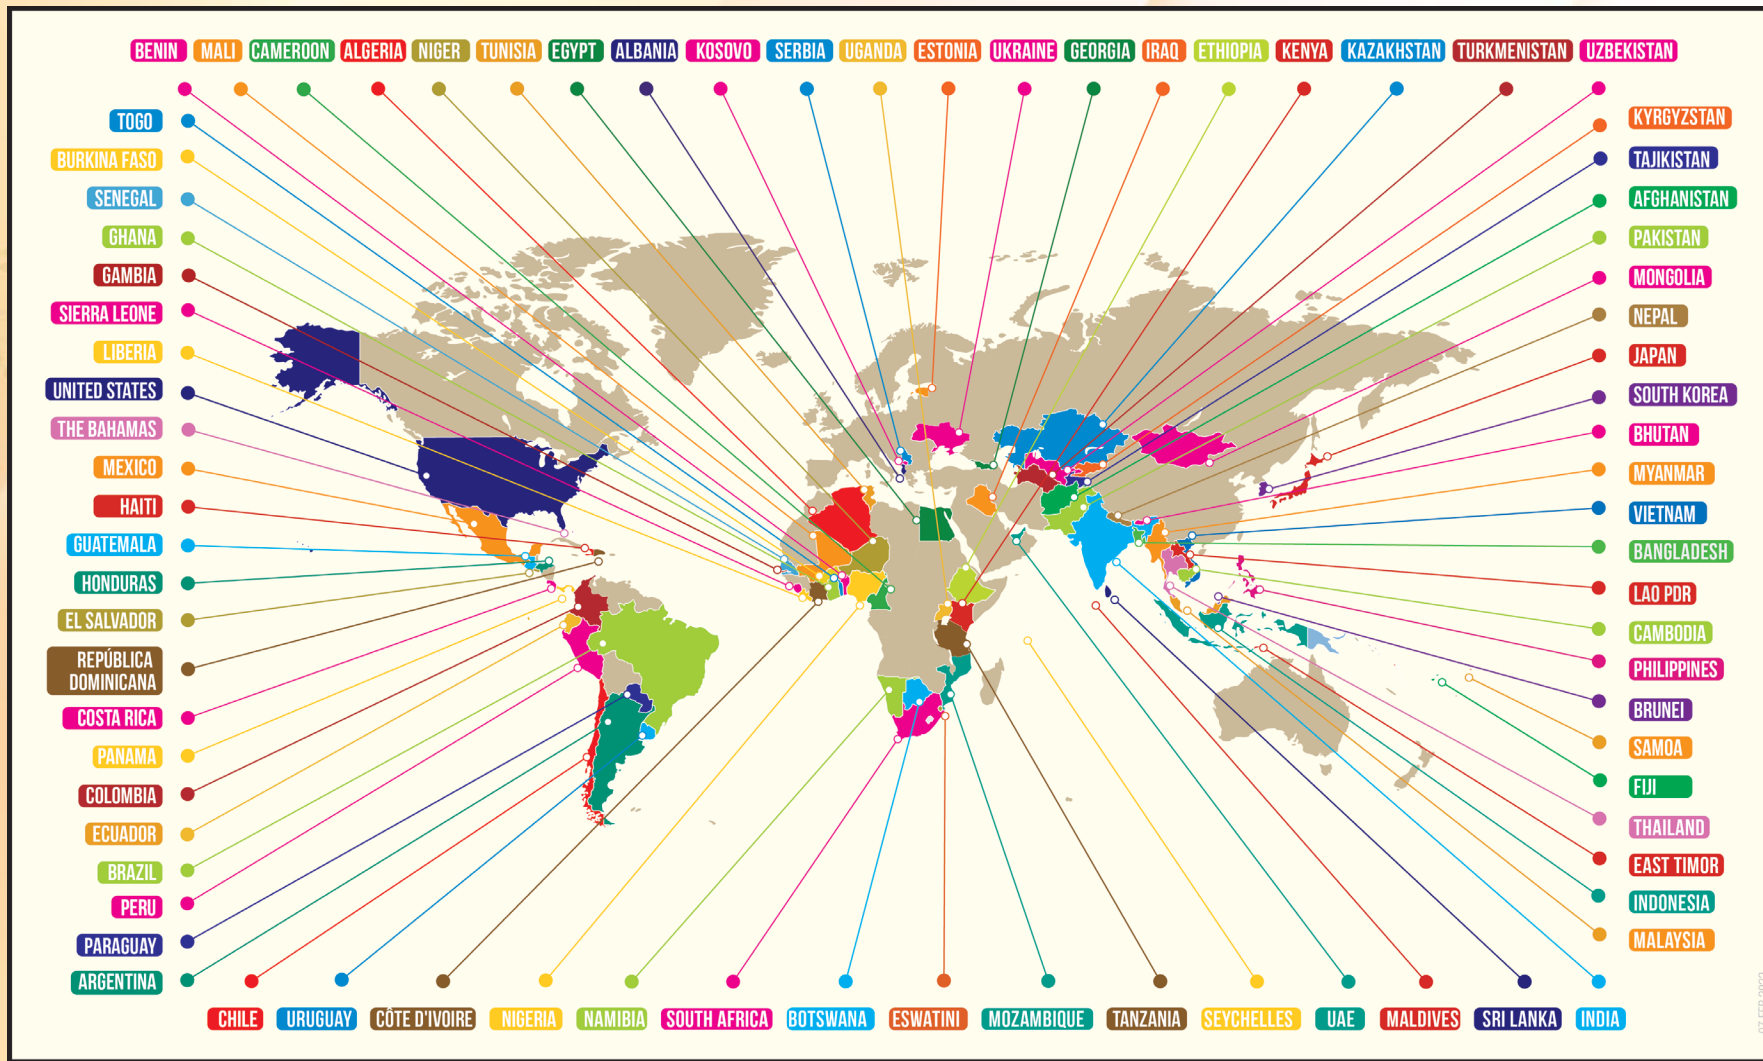

Self-led courses

These UTC courses are designed to be completed at the learner's convenience according to their own timeline. Currently UTC 7 and 8 are transformed and are available at the ISSUP website.

The screenshot shows the ISSUP website interface. At the top, there is a navigation bar with 'Log in' and 'English' options. Below this is the ISSUP logo and a search bar. The main content area is titled 'Welcome to the Online Learning Hub!' and includes links for 'Professional Development', 'Universal Curricula (UPC/UTC)', and 'Global Training Program'. A sidebar on the right provides more details about the courses and registration process.

DAP remains relevant and innovative in delivering effective drug demand and supply reduction interventions — and therein lies its global impact

Thank
you!
